

MECHANICODE

Peace of mind with
Technology

We believe automation is vital to agility. Taking human error out of the equation improves and enhances the cloud experience.

We have 13 years of experience developing innovative automation solutions using DevSecOps and Digital Service best practices

HUBZone Certified AWS Azure Certified

Primary NAICS:
518210

Past Performance

Core Competencies

518210 – 1/22 - present GSA + CDC COE Re-Engineering (GSA TOTAL Contract)

Mechanicode was tasked with providing cloud IT product assessment, design, development, re-architecture, enhancement, deployment and operations and maintenance for the CDC IT Portfolio while establishing DevSecOps enterprise conventions.

518210 – 2/2021 – 12/2022 - NASA Ground Station POC

Mechanicode had an engagement with NASA, in which they wanted to modernize how they react to disasters taking advantage of direct satellite acquisition and cloud-scale processing that will reduce latency from acquisition to data availability for scenarios like disaster response.

54151 – 1/2021 – Present - Private Firms & Startup DevSecOps services

Mechanicode audits the start-up’s continuous integration infrastructure. Plans and implements deployment and operational infrastructure as agreed upon post-audit. Design and build a modernized cloud-based continuous integration infrastructure for our distributed software systems. As well as develop and deploy operational metrics and observability tooling.
